Australian Stock Exchange : Options

The major ASX Options are available in an existing symbols list on your 3 PocketWatch application. To set up ASX Options symbols in a watchlist

- Select 'Options'
- Then select '**Options Trader**' and select '**Options Autofill**'
- Scroll down the list and select the option you require
- This will load the ASX Option symbol in your Watchlist

This preloaded ASX Option list has populating symbols that will load the related strike prices. They are represented in symbols with the three letter ASX code followed by '/' and the month number: 0, 1 or 2 (where 0 is for the current month, 1 is for the next month and so on), Followed by '/' and C (Calls) or P (Puts)

Sydney Futures Exchange

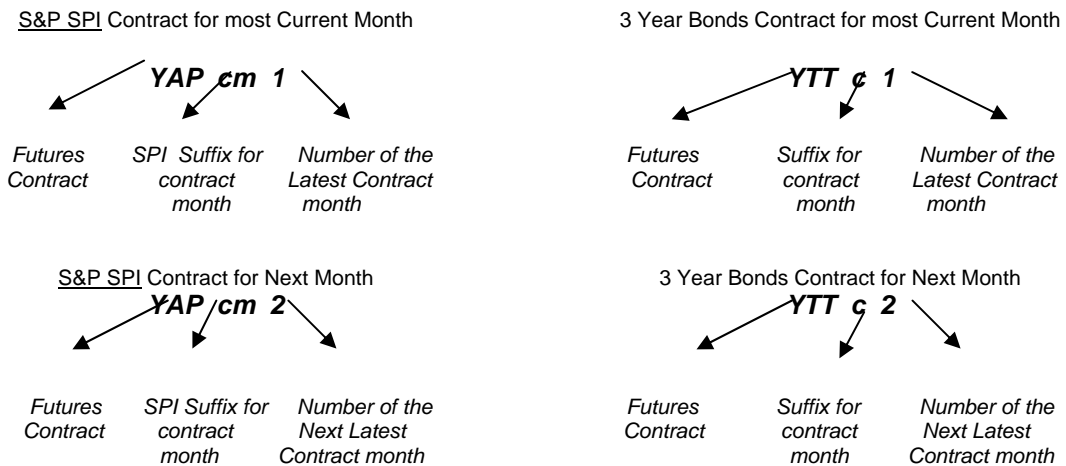

The Table below provides the various symbols for a 24 Hour, only Day and only Night data feeds on the current SFE Futures contracts.

Contract	24 Hr Symbol	Day Symbol	Night Symbol
Share Price Index (SPI)	YAPcm1	2YAPcm1	1YAPcm1
3 Year Bonds	YTTc1	2YTTc1	1YTTc1
10 Year Bonds	YTCc1	2YTCc1	1YTCc1
Bank Bills	YBAc1	2YBAc1	1YBAc1
SFE Cattle Futures	YCTc1	2YCTc1	1YCTc1
30 Day Inter Bank Cash Rate	YIBc1	2YIBc1	1YIBc1

- The symbol for **SPI** Futures contracts under the Sydney Futures Exchange can be obtained by adding the suffix 'cm' preceded by the number of the latest contract in ascending order on the required symbol.
- The symbol for all other Futures contracts under the Sydney Futures Exchange can be obtained by adding the suffix 'c' preceded by the number of the latest contract in ascending order on the required symbol.

These contracts will automatically roll over to the next latest contract when the current contract expires.

Examples:

The symbols can be entered to give Day only, Night only or a 24-hour data feed.

- To get Day only contract symbol, a prefix 2 is added to the desired 24 hour symbol
 - To get Night only contract symbol, a prefix 1 is added to the desired 24 hour symbol
 - To get the 24 Hour Data feed, the symbol can be added with only the suffix preceded by the contract month number.
- (refer to the table above)

To get the Symbol for the next latest contract simply replace the suffix '1' to '2'

For example:

If the most current contract month for the SPI 200 Futures is September then the symbol is **YAPcm1** (24 Hour Symbol), **2YAPcm1** (Day Symbol) or **1YAPcm1** (Night Symbol). To get the next latest contract month, in this example will be December, the symbol is **YAPcm2** (24 Hour Symbol), **2YAPcm2** (Day Symbol) or **1YAPcm2** (Night Symbol).

These symbols are designed to roll over automatically, hence in this examples when the September contract expires symbol YAPcm1 will roll over to December while YAPcm2 will roll over to January. The same applies to the only Day and only Night symbols. (refer to the Table above)
